

# BENEFITS TO YOUR BUSINESS

## HELP BUILD A QUALIFIED FUTURE WORKFORCE

The Dane County Youth Apprenticeship Program gives area high school students on-the-job experience in their chosen fields that augments their academic and technical studies. The program helps students prepare for careers while still in high school, developing the technical and job skills you and other community employers are looking for.

## TRAIN YOUR OWN FUTURE STAR EMPLOYEES AND DECREASE HIRING/ TRAINING EXPENSES

By hiring and mentoring youth apprentices, you'll help improve the pool of qualified candidates available locally. After the students graduate, you may even find yourself hiring the apprentices you've trained, without a time-consuming, expensive search process.

## GIVE BACK TO THE COMMUNITY

It's everyone's responsibility to support the community in which we live, work and play, and to help grow our business community. That involves developing a qualified workforce.

By participating in the Youth Apprenticeship Program you'll do just that, while also:

- Helping ensure curricula incorporate the latest technology and industry practices
- Raising awareness of your industry among our future workers
- Enhancing your organization's image as an active community citizen
- Supporting Dane County's schools
